### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

This office action is in response to applicant's election filed August 29, 2005.

#### *Election*

Claims 37-40 and 48-52 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election<sup>1</sup> was made **without** traverse ("prejudice") in the reply filed on August 29, 2005.

#### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 22-29, 35, 36, 46 and 47 are rejected under 35 U.S.C. 102(e) as being anticipated by Chaudhuri et al. (U.S. 6,660,560).

Chaudhuri (Fig. 1-7) disclose:

(cl. 22) a component package, an underfill material (10) over a plurality of pads (26) in a component-mounting area of a substrate, the underfill material comprising a filler material containing particles (24), a component (20) on the component-mounting area,

---

<sup>1</sup> Upon applicant's response pursuant to 37 C.F.R. 1.121 (e), applicant is required to include the proper claim status (e.g. withdrawn) or the application will be deemed an intentional non-responsive.

such that terminals of the component are aligned with corresponding pads (Fig. 4) and substantially enveloped in the underfill material, the particles potentially inhibiting (e.g. "silica") suitable connection between corresponding terminals (22) and pads unless the particles are substantially removed; with one or more particles being embedded in ("substantially unimpeded"; Abstract) one of the terminals, in its corresponding pad, or in both the one terminal, and terminals to physically contact the pads and to remove substantially all potentially inhibiting particles ("substantially unimpeded"; Abstract) from between corresponding terminals and pads (Fig. 6-7)

(cl. 24) with solder on pad (e.g. terminal (Abstract);

(cl. 26, 29) wherein filler ("silica"; CLM 11 of Chaudhuri);

(cl. 46) fluxing agent (CLM of 3 of Chaudhuri).

With respect to claims product by process limitations of claims 22-29, 35, 36, 46 and 47 such as "applying suitable pressure by...thermocompression bonder," "applying suitable pressure and heat are performed concurrently by apparatus, " or "pads are pre-coated with solder...applying heat," the prior art structure is the same as the claimed invention. "[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art discloses in Xu et al. (U.S. 6,680,436) fillers embedded in terminals/pad.
